

## **Summary of the 2015-2016 Trust Lands**

We spent \$70,102 from the Trust Land Grant that we implemented for the 2015-2016 school year. Our goal was to increase our reading scores in lower grades and our math scores in upper grade. Our scores in lower grade reading and upper grade math showed positive growth for our students. As part of the grants, we are to inform our parents how the money was spent. Trust Land funds were spent and supported us in reaching our goals. These funds were used to do the following:

- Full time aides in each kindergarten classroom
- Provided an extended day program for kindergarteners struggling with math and reading concepts
- Provided a before and after school program (Double Dose) to help students in reading and math
- Provided Professional Development for our teachers
- The purchase of Chromebooks, headphones, and mice to help develop and reinforce curriculum needs and to enhance the school's technology
