

Win a Pizza Party for our class!

Parents,

Our class is competing to win a **Free Pizza Party from Little Caesars** by being the first 3rd-grade class at our school to pass off all our multiplication facts this year! To help us out, Big Brainz is letting our grade use their high-end fact fluency program, Timez Attack. Students can play this game from home, so please encourage your student to play regularly. And remember, truly mastering all the facts will be a challenging, rigorous process for most students, so please be encouraging, yet patient.

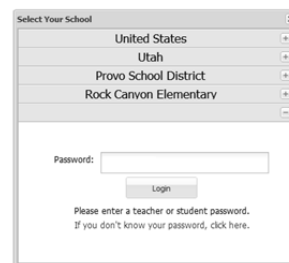

Here's how to download and set up Timez Attack at home:

Step #1

Remove any old versions, then go to www.bigbrainz.com/Schools.php to download and run the **NEW** Windows or Mac installer.

Step #2

Select our State, District, and School. Your student's password is: _____

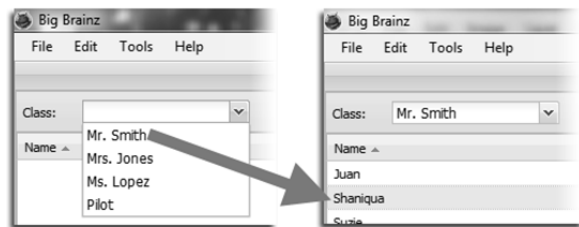

Step #3

Select the teacher, then the student.

Step #4

In the future, use the Desktop Icon to launch.

Step #5

Observe and Encourage. Make sure to observe your child's progress so that you can be appropriately patient yet encouraging. Timez Attack will make the process fast, fun, and rewarding, but it is still very rigorous and challenging. Be aware that initially some students will also be learning keyboarding and spatial recognition skills.
