

SCC Meeting

November 18, 2020

1. Introduce Ross Menlove:

Introductions of the rest of the members

2. Internet safety:

We lost NetSmartz from the Legislature, we have had them come in the past. Lower grade and Upper Grade assemblies. Cost would be \$600 a year. Our Computer teacher teaches each class- cyberbullying and internet safety.

-Is there a company that would donate \$600 to us for Netsmartz assembly? Julie Shumway will look more into this.

-Amendment made by Julie Shumway to use TL funds (\$600) for the NetSmartz program, Second by Jessica Young

3. Procedures and bylaws:

-There are procedures that we follow but we don't have our own procedures and by-laws

-Council Formation and Leadership- we currently have 3 school reps- principal and 2 teachers, and 5 parents

-Are we wanting to change that? It would be nice to have parents from the different neighborhoods of the school boundaries. That might be difficult to get parents to volunteer from the neighborhoods. Include more parent members- up to 6 (maybe)- update the bylaws in May, Carla will start promoting that in the May newsletters.

-Do better with letting people know about SCC.

-Looked at other councils' bylaws and made suggestions and changes to what we would like to see for ours. We like Liberty Hills bylaws the most.

Change:

-Notes to be taken by a council member.

(Does not need to be done by Vice Chair).

-Name

Add:

- Attendance
- Expenditures

-All meetings are open to the public and the public is welcome to attend.

-Only the council members will be able to vote.

-Carla will type up the bylaws with the changes we like and then Julie Shumway will format it to look nice.

4. Items on the Stakeholders Report:

-Every Jan. Carla has to do a Stakeholders Report. We have benchmark data to use this year. She'll also include a community piece.

-What does the council think should be included in this: Creative things we are doing during this time, how are we bringing people together (Virtual Halloween Parade), Christmas Sing (virtually), etc. Quotes from students

-What are they being used for?

-It's a report for our school community. It shows what money we have and where and how it is being used.

-It goes to the School Board as well.

5. Questions:

Why aren't we doing livestream classes? (Jessica Young)

Classes would be disjointed, teachers are having to do a lot after school for online school, FERPA, and individualizing of instruction makes it difficult to livestream classes.

Motion to adjourn- Jessica Young, second by Julie Shumway
